

RECIPE FOR FISHING SUCCESS

Chocolate Chip Bar

My wife is a **very good cook**. She usually **uses long-established recipes** that **have survived the test of time**, and **gets consistently successful results**. She **follows the recipe directions "to a tea"** to obtain best results. Whenever she **changes** or adds to the recipe, **results suffer**. It seems that **the combination of ingredients, utensils, and procedures used in each time-tested recipe are very important as a total package**. Trying to change any part can upset the end result. She **does not wish to create new recipes and do a lot of research, she just wants successful results**.

Spoonplugging is similar and is a **time-tested recipe for consistent successful results in fishing**. The **ingredients** are the **knowledge and Guidelines** that Mr. Perry has given us, the **utensils** are the **tools that he recommends** we use in our fishing, and the **procedures** are the **presentation of lures outlined specifically** in his book. Many have asked: **"Why aren't my fishing results better? I believe that Spoonplugging makes total sense and I have seen the results it can produce, but I am not satisfied with my own results."** After questioning these people about the equipment they use and how they present lures on the water, **small details are usually found where they are not following Spoonplugging Guidelines or using the proper tools**. Often they **attempt to incorporate one or more other "recipes for fishing"** (methods) to use **along with Spoonplugging** procedures, resulting in **dilution and confusion**. **Just try** to pick and choose utensils, ingredients, and baking procedures from **10 different cookie recipes** and see what it tastes like! It's like trying to create a time tested recipe overnight.

Spoonplugging is a TOTAL concept, a recipe for successful fishing for all species on all waters. **All** the knowledge, tools, and procedures **must work together** to produce the

best results. **It has been a time tested and proven recipe for over 60 years.** Those who strictly follow the Guidelines and use the recommended tools will get the best results. Certified Spoonplugging **Instructors are available** to people **who need help** improving their knowledge, tool selection, and lure presentation. The **most difficult** part is **getting rid of old habits and thinking.** They hinder our fishing growth.

Go with the proven and time tested recipe for fishing success, **Spoonplugging. Why alter or change it? Follow directions and just DO it!!**
